### **TRA Issues New National Numbering Plan Regulation**

Today TRA issued a Regulation for the enactment of a new National Numbering Plan, which has been published upon TRA's website.

The Regulation will come into legal force upon publication in the Official Gazette.

However, TRA will accept applications from interested eligible licensed operators from **18 September 2008** for new number ranges, opened by the National Numbering Plan approved by this Regulation.

Licensees that are assigned numbers from these ranges may not use them until the National Numbering Plan has been published in the Official Gazette.
